

Some exciting new to share with the MRC membership.

We have a signed lease with the Cotton Hanlon Co. for the southern Marathon property. I have attached a PDF of the map, which Gary Daniels scanned. He will also be providing copies to be handed out at the meetings.

Below are the directions to get to the property and should be posted on our Facebook and web site. The new posting signs are ordered and when received we will announce the work days to post the lines.

The members can immediately enjoy hiking, 4 wheeling, bird watching and planning the fall hunt on this new lease land. There is a deeded access R.O.W. on Rt. 221 at the red barn. PLEASE don't block the driveway of the home.

The State land access from Grigg's Gulf State Forest Rt. 200 and Grigg's Gulf Road has road work being done on it and may have limited access (more info on that as we get into May / June).

I attached a way point here to assist in the location.

On another note – the property in Cincinnatus (Taylor or Freeman Rd off Cheningo Solon Pond Rd. property) has the new 2020 lock on the gate. The lease land owner Farm East (Gutches) is having the hardwoods logged at the moment. All members can still access this property as long as they take great care in giving the loggers the safety and curtesy they deserve. If the gate is locked please lock it behind yourself. If it's open please keep it open for the loggers.

I attached a way point here to assist in the location.
